

## **Sustainability Statement**

The sustainability principles of QuestSpecialty Corporation are not just a plan, but a corporate way of life embedded in our corporate DNA. Sustainability is an integral part of all processes, practices, and procedures. Procurement, manufacturing, building maintenance, employee hiring, and development are constantly reviewed to strive for improvement. The goals to fulfill the needs of current generations without compromising the needs of future generations is a constant consideration. The intent is to support a balance between economic growth, environmental growth, environmental care, and social well-being.

The metal aerosol can is one of the largest components of our procurement process. Depending on the style, metal aerosol cans with up to 45% recycled material are bought. Recycling metal cans reduces greenhouse gasses over time compared to making cans with virgin material. The metal can is recyclable forever. Purchasing recycled tips, caps, and boxes where applicable. Shipping cartons have up to 23% recycled content in them and are recycled after use. All corrugated and paper packaging materials used in packaging components from our suppliers are recycled. Drums and totes where applicable are recycled and/or reconditioned for reuse. In house programs recycle simple paper products to conserve electric and gas energy.

QuestSpecialty Corporation strictly follows all national, regional, and local environmental regulatory agency guidelines.

Regular internal audits are conducted to identify and measure sustainability efforts. Carpools and public transportation are encouraged. To conserve water and energy, our facility is equipped with automatic lighting and sinks.

To positively affect employees, QuestSpecialty Corporation strives to provide fair wages, promotion from within, diversity in education, and a safe work environment.

QuestSpecialty Corporation's ongoing commitment to sustainability strives to achieve the lowest environmental impact and greatest economic and social benefits allowing us to be part of turning goals into reality.
