# INFERNO

## MUNICIPAL SEWER COMPOUND LIMPIADOR DE DRENAJE MUNICIPAL

- Contains Highly Visible Tracer
- Attacks: Roots, Paper, Oil, Grease

**DANGER/PELIGRO**  
CAUSES SEVERE SKIN BURNS AND EYE DAMAGE.  
CAUSA QUEMADURAS GRAVES EN  
LA PIEL Y LESIONES OCULARES.

**NET WEIGHT: 50 LBS. (22.7 KG)**

## INFERNO

This product is a powerful chemical compound made for municipalities. When activated by water this product will generate heat, generate agitation, emulsify grease, emulsify oil, attack roots and digest paper. This highly effective compound provides deep penetration, is non-corroding, will attack hardened detergents and contains a highly visible tracing color.

**DIRECTIONS FOR USE:** In using this compound, shovel 20 to 25 lbs into strategic manholes and let this heavy duty, red colored chemical do the rest. **FOR MUNICIPALITIES:** The recommended application is about 25 lbs shoveled or poured into strategic manholes. If larger doses are necessary, 50 lb additives of this compound may be used. This product needs water to do its work. If sewer system is dry, water should be poured down the manhole AFTER the compound is added. **FOR INDUSTRY:** This compound is recommended for unstopping drains in food plants (particularly in packing houses where accumulations of organic matter tend to clog drainage systems) by shoveling or pouring a reasonable amount into the drainage system. This product becomes activated by water, creating considerable heat and agitation, thus removing or loosening debris and settlement in sewers and drains. It contains chemicals and metallic chips which will emulsify grease and oils and will digest paper and other materials containing a high percentage of cellulose. When added to strategic manholes, you will be able to see the effectiveness of this product throughout the sewer pipe system at later intervals by observing traces of the color in other areas of the system.

**MODO DE EMPLEO:** Cuando se use este compuesto, ponga de 20 a 25 libras en alcantarillas estratégicas y deje que este químico rojo y pesado haga el resto. **PARA MUNICIPALIDADES:** La aplicación recomendada es de 25 libras, viértalas en alcantarillas estratégicas. Si se necesitan grandes dosis, se pueden usar 50 libras de aditivos. **PARA USO INDUSTRIAL:** Este compuesto es recomendado para drenajes que no se detienen en plantas de alimentos (particularmente empacadoras donde la acumulación de materia orgánica tiende a tapar los drenajes) para que sea vertido en cantidades razonables en el sistema de drenaje. Este producto se activa con el agua, creando considerable calor y agitación removiendo basura y sedimento del drenaje. Contiene químicos y piezas metálica que emulsifican la grasa y aceites y digiere el papel y otros materiales que contienen gran porcentaje de celulosa. Cuando se pone en alcantarillas estratégicas, se puede ver la efectividad de este producto a través de la cañería siguiendo el rastro del color por las áreas en que ha pasado.

**DANGER:** Causes severe skin burns and eye damage.

Do not breathe mists. Wash hands/gloves thoroughly after handling. Wear protective gloves, eye protection, protective clothing. If swallowed: Rinse mouth, do NOT induce vomiting. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. If inhaled: Remove person to fresh air and keep comfortable for breathing. Immediately call a poison control center. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Store locked up. Dispose of contents and container in accordance with local and national guidelines.

**PELIGRO:** Causa quemaduras graves en la piel y lesiones oculares.

No respire los vapores. Lávese bien las manos/guantes después de manipular. Use guantes protectores, protección ocular y ropa de protección. Se se ingiere: Enjuague la boca, NO induzca vomito. Si en la piel (o el pelo): Qítense inmediatamente la ropa contaminada. Enjuague bien con agua. Lave la ropa contaminada antes de usar. Si es inhalado: Remueva la persona al aire fresco y mantenga cómoda para respirar. Inmediatamente llame al centro de envenenamiento o al médico. Si en los ojos: Enjuague cuidadosamente con agua por varios minutos. Remueva los lentes de contacto, si están presentes y fáciles de hacer. Continúe enjuagando. Guarde bajo llaves. Elimine el contenido y el recipiente de acuerdo con las ordenanzas locales, estatales, y reglamentos nacionales.

**HMS RATINGS:** Health - 3, Flammability - 0, Reactivity - 0, Personal - D.
