

## COVID Re-Open: Graffiti + Signage Residue Removal

*Picture: "Graffiti on a Pedestrian Bridge" from "A Journal of the Plague Year: An Archive of COVID-19"*

Some businesses still show remnants of the time they were closed ... graffiti on exterior walls, tape residue from signage, or residue from social distancing markers.

We've got the products to clean it up and help prevent similar damage in the future.

### GRAFFITI CLEAN-UP

Unattended businesses are attractive to those looking to create graffiti as many brick-and-mortar stores discovered during stay-at-home orders.

**2210 GRAFFITI GONE Vandalism Mark Remover** is quickly applied and its heavy-duty formulation effectively removes not just paint and ink, but also tape marks, on a variety of surfaces: aluminum, steel, glass, concrete, brick and more.

- Gel formula adheres to vertical surfaces for longer contact time
- Removes lipstick, ink, paints, crayon, wax, pencil marks and scotch tape marks
- No CFCs

## GRAFFITI PREVENTION

When applied to hard, non-porous surfaces, **2150 NO MISCHIEF Graffiti Barrier** forms a protective wax barrier which resists graffiti and other stains.

After initial application, NO MISCHIEF will remove new graffiti and re-coat surfaces with a barrier film in one easy step.

Works great on vinyl bus seats, school desks, counters, restroom partitions, lockers, etc.

Although formulated for non-porous surfaces, watch this video on how it works on irregular surfaces such as travertine tile.
