

## COVID Re-Open: A/C and Ice Machines

Confidently welcome guests back with clean, deodorized air conditioner coils and freshly maintained ice machines.

A thorough cleaning and deodorizing of the air conditioner condenser coils will bring overall freshness to your building.

**Water filters in ice machine water filters only address water filtration.** These machines develop a build-up of calcium, lime and other contaminants, particularly when they have been dormant for a while. Make sure ice machines are clean and ready for safe use.

---

### CLEANING AIR CONDITIONER COILS

**5390 SIDEWINDER Foaming Cooling Coil Cleaner makes easy work of cleaning coils!**

It penetrates and removes dirt and matted material quickly from air conditioner coils and fins.

No rinsing required as the condensation produced washes soil away from treated surfaces, leaving the unit clean and deodorized.

---

## CLEANING ICE MACHINES

**6662 SHINY NICKEL Nickel-Safe Ice Machine Cleaner** effectively cleans scale from all metal surfaces, including stainless steel and nickel-plated steel.

It is non-foaming, non-fuming and USDA approved for use in federally inspected meat and poultry plants.

It contains special inhibitors to minimize corrosion.
