COVID Re-Open: Outdoor Precautions

As the world starts taking advantage of summer weather and restaurants are moving business outdoors, make sure your hardscapes are weed-free for a more pleasant social distancing experience and staff is protected from mosquitoes.

WEED-FREE HARDSCAPES, EATING AREAS

4520 DOOM 2,4-D Solvent-Based Weed Killer aerosol delivers rapid top kill of all weeds.

Since DOOM is a non-selective spot weed killer, it is perfect for ridding unsightly weeds from hardscapes, outdoor eating areas, parking lots, walkways, and loading docks ... particularly when you are not sure what type of weed you have.

Because it is a systemic herbicide, it is absorbed by foliage and permeates to other parts of the plant, preventing future growth for up to one year.

PROTECTION FROM MOSQUITOES

4360 NOT THIS TIME Natural Insect Repellent is the newest addition to our repellent line.

It has no harsh chemicals, artificial colors, fragrances or synthetic pesticides in its DEET-free formula.

It is strong enough for outdoor workers (including new outdoor foodservice servers) and safe enough for babies, toddlers, kids and pets.

Looking for a repellent with DEET? We've got several different products to choose from!
