WHAT TO SEE AT BOOTH 2663

PRODUCT DEMONSTRATIONS

See how a number of our products deliver extraordinary performance. A crowd favorite is watching how CARBON OFF! removes the heaviest carbon build-up in minutes with the edge of a business card.

BUSINESS BOOSTER LIBRARY

This growing library of specialized product guides suggest the most appropriate items for addressing specific facility cleaning and maintenance needs and targeted challenges such as marijuana smoke elimination and ice machine maintenance.

EXPANDED ODOR CONTROL PROGRAM

Get re-acquainted with our expansive odor control program with new layered scents in dry air fresheners, metered air fresheners, gelled air fresheners and total release foggers.

ISSA COVID-19 PROTOCOL

Be aware of the updated protocols for entrance to the show. This includes proof of full vaccination 14 days before the show or negative tests according to ISSA's specific guidelines. [click for rules](#)

NOT ATTENDING ISSA?

Contact your QuestSpecialty rep to fill you in on current product information, new developments, details of our 24-Case Program for private label, and more!

#WEAREGOING!

REAL-LIFE CONNECTIONS AT ISSA

During COVID-19, we all experienced the benefits of having video conferencing to stay connected. Whether it was ZOOM, Microsoft Teams, GoToMeeting or another similar platform, they were essential for conducting business during a time when we could not meet in person.

However, no matter how advanced a video conferencing platform is, it can never replace in-person contact. **And that is why #WeAreGoing!**

This year's ISSA show gives us the opportunity to shake hands, share experiences from the last two years and discuss how our extensive product line of specialty chemicals meet specific maintenance needs.

Developments at QuestSpecialty Since the Last ISSA

It seems surreal that the last in-person ISSA Show was 24 months ago. Since that show, here are a few of the happenings at QuestSpecialty:

- **New product introductions** have included:
 - 2580 SIMPLY LAVULOUS Lavender All-Purpose Cleaner
 - 4360 NOT THIS TIME Natural Insect Repellent
 - 6930 APPLAUSE Gelled Hand Sanitizer – Qt. Bottles
 - 3015 GROUNDS KEEPER Coffee Urn & Pot Cleaner
 - 5570 MISTER BLISTER Paint Remover, MCL-Free Formula with 360° valve
 - 8110 CLEAN BRAKE Non-Chlorinated Brake Cleaner
 - 5780 NO SPAT Anti-Spatter
 - Re-Formulated 2940 BRILLIANCE Stainless Steel Cleaner
- **Streamlined DS cans** for private label: sleek, smooth and seamless.
- **Business Booster Program:** A library of specialized product guides.
- Plans are underway for **expanding our production floor and lines.**

SINGLE SOURCE FOR SPECIALTY CHEMICALS

With over 400 different specialty chemical products, QuestSpecialty is the obvious choice for a single source supplier.

Our extensive product line has a solution for every facility maintenance challenge. Specialty chemicals are **easily integrated into existing product lines** and fulfill the need for the right specialized chemical for the task at hand. We make it easy to have **products which extend beyond the housekeeping closet** and into plant maintenance, food processing and preparation, garage/fleet maintenance, groundskeeping and HVAC.

AUTOMOTIVE

20+ SPECIALTY PRODUCTS FOR LUBRICATION, GREASE, BRAKE/PARTS CLEANING, DETAILING AND DEODORIZING.

INSECTICIDES/HERBICIDES

20+ PRODUCTS TO ELIMINATE & CONTROL PESTS INCLUDING EPA 25(B) EXEMPT, MINIMAL RISK PRODUCTS.

LOWEST PRIVATE LABEL MINIMUMS!

We've put private label products within the reach of distributors who previously were unable to consider having their own line as we've lowered the industry minimum order threshold with our 24-Case Program.

For a minimum order of just 24 cases (or 288 cans) distributors can have their own brand. The program includes virtually all of our stocked aerosols (400+) of both commodity (general cleaners, lubricants, etc.) and specialty aerosols, such as our popular Minimal Risk Pesticides which are EPA 25(b) exempt.

Similarly attractive private label minimums are available for our non-aerosol products including liquid concentrates, liquid ready-to-use, grease cartridges and wipes.

YES. YOU. CAN.
HAVE YOUR OWN BRAND!

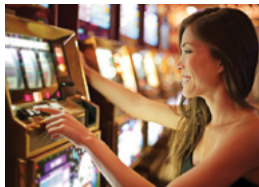

"Distributors are becoming more interested in carrying private label products for a variety of reasons," notes Alex Pratt, director of technical services at QuestSpecialty Corporation.

"Distributors enjoy a healthy profit margin and no brand competition with private label products while their customers benefit from a high performing product with a good price point," Pratt continues. "Private labeling is a win-win situation."

See us at ISSA for details or contact your QuestSpecialty rep.

ANATOMY OF A CASINO FLOOR

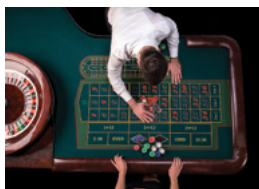

SLOT MACHINES

Keep slot machines clean and inviting with **2130 SHEEN Glass Cleaner**. Its foaming formulation cleans and polishes without streaking. It is also safe for use on plexiglass, as it contains no ammonia. The non-static formulation keeps surfaces cleaner, longer without leaving a film.

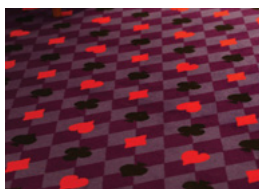

CIGAR & CIGARETTE SMOKE

Casinos have the most advanced air filtration systems imaginable, yet smoke odors can linger when they become embedded in porous surfaces such as upholstered chairs and carpet. **3640 OUT COLD Total Release Smoke & Odor Eliminator** quickly eliminates smoke odors by using a quick, manual, short burst of spray or by setting the special two-way valve for fogging.

LEATHER BUMPERS

2620 SHOWTIME Invisible Coating & Bug Shield cleans, shines and protects leather while repelling dirt, dust, fingerprints and smudges. It dries quickly and buffs to a streak-free finish and resists scratching and marring of surfaces. It can also be used on vinyl surfaces and prevents cracking, fading and hardening.

CARPET & UPHOLSTERY

2510 OUT OF SIGHT Carpet & Upholstery Cleaner is ideal for quick spot cleaning of carpet, upholstery and textiles. The heavy-duty foam penetrates and breaks down protein and organic soils such as blood, cosmetics, urine, wine, alcoholic beverages, grease, vomit and more.

REFORMULATED BRILLIANCE

The newly reformulated, NSF C1 approved 2940 **BRILLIANCE Oil-Based Stainless Steel Cleaner** is getting rave reviews! Check out these key improvements:

- Super-fast drying action
- Increased grease cutting ability
- NSF C1 registered
- Refreshing lemon fragrance

BRILLIANCE cleans, brightens, polishes and protect stainless steel, as well as aluminum, chrome and brass. Use just minimal effort to remove smudges, soil and stains. Plus, it forms a protective shield which resists water marks and rusting.

CORPORATE CHEF APPLAUDS FOAM PLUS

Cleaning greasy, baked-on build-up on kitchen equipment is a nasty job in a corporate kitchen. This corporate chef was so impressed with the performance of **FOAM PLUS Oven Cleaner** he took the time to let us know.

“ I have been in the kitchen for a long time and have had to clean a lot of dirty, greasy kitchen equipment.

(QuestSpecialty's) Foam Plus Oven Cleaner is one of the best products that I have used.

... I was very impressed the first time I used it and every time since. It is now a staple cleaner in our kitchen! ”

Foam Plus works on a number of surfaces including grills, stainless steel ovens, rotisseries, brick/stone ovens, commercial fryers, rangetops and conveyor ovens.
