News from your Specialty Chemical Experts

HOUSEKEEPING

2070 WHAM Foaming Citrus Cleaner & Degreaser is perfect for removing heavy grease and soil on metal, porcelain, tile and grout. It is an USDA authorized heavy-duty citrus-based foaming cleaner.

FOODSERVICE

Bright, shining stainless steel is just a wipe away with **140406 BRITE SHINE** Stainless Steel Cleaner and Polish Wipes. After cleaning, the formulation provides a protective coating to resist finger smudges.

INDUSTRIAL

Got a particularly stubborn rusted part? **5970 CHILL OUT** Freezing Penetrating Lubricant is the spray for you. It shrinks the area being sprayed and thus creates openings for the lubricant to penetrate and loosen bound parts.

AUTOMOTIVE

Be ready for auto air conditioning this summer by treating your A/C system with **3295 RE-FRESH** Auto Air Conditioning Freshener. It is EPA registered to kill odor-producing organisms and keeps interiors smelling fresh and clean.

BE READY FOR SUMMER FOOD CONCESSIONS!

Check out Business Booster Product Guide for **Cafes, Foodservice Venues & Concessions**. Also a great guide for Food Trucks!

GRAPPLING WITH GRAFFITI

The weather is warmer, school is out and that means its time to grapple with graffiti. Graffiti vandalism is unsightly, costly, leads to additional crime and brings down property values.

In an experiment conducted in a low-crime city neighborhood, researchers placed cash in an envelope, partially stuck in a mailbox. **When the mailbox was covered with graffiti, 25% of passers-by stole the envelope** compared to about 13% who took the envelope from a clean mailbox.

These results support the "broken window theory" of crime that states visible signs of minor crime encourages further crime.

Graffiti also decreases property values. Experts estimate **properties with graffiti lose 15 percent of their value and up to 25% if the graffiti is obscene or hateful.**

→ Remove Graffiti Within 48 Hours for Zero Recurrence ←

Studies show that **removing graffiti within 24 to 48 hours after it appears results in a nearly zero rate of recurrence.**

About 80% of graffiti is done by teenagers seeking notoriety for their tagging. By quickly eliminating the graffiti, it denies that visibility.

Remove graffiti as quickly as possible with **2210 GRAFFITI GONE** Vandalism Mark Remover. It is USDA authorized, removes paint and ink from a variety of surfaces and its gel formulation clings to surfaces for longer contact time.

Once graffiti is removed, apply a graffiti barrier, such as **2150 NO MISCHIEF** Graffiti Barrier. **Barrier coatings are the most prevalent form of preventive maintenance.** They can make it harder to leave marks on a surface and makes it easier to remove any future graffiti.

SUMMER DUST CONTROL

Dry summer days create the perfect condition for airborne dust, particularly on unpaved gravel and dirt roads such as golf cart pathways, festival parking lots, county fairs, sports fields and campsite access roads to name a few.

Watering the surface is not always an option as it is labor-intensive, depletes water resources and dries quickly. Likewise, limiting traffic is also not always a viable strategy.

The best solution: Apply **6070 PAVE THE WAY Road Hardener & Dust Reducer**. Its silicate-based formula creates a hardened coating on the unpaved surface. Just spray over the area and allow to harden.

HIGH VOLTAGE CLEANING

It is time for a "Spring Cleaning" of high voltage cables, electrical devices and metal surfaces using our new **8075 POWER TRIP Cable Cleaner and Parts Degreaser**. It is a non-flammable, multi-functional formulation that can be used for many different metal surfaces to remove grease and grime and keep things working smoothly.

POWER TRIP is ideal for removing build-up as it works quickly, dries fast and won't leave behind any residue. With a dielectric strength of **37,000 volts**, use it on high voltage cables and power lines, small electrical motors, generators, outboard motors, refrigeration and air conditioning units.

HITTING THE RV ROAD

It's RV Season! Approximately 13 million US households own a Recreational Vehicle and most of those RVs have at least one "slide-out," a section which extends outward to add space.

To keep slide-outs working smoothly, they should be lubricated at least twice a year. Any moving part, or parts that move together, should be lubricated, including racks, cables and any exposed gears.

Although developed for lubricating equipment in the food packaging and processing industry, **5380 SLIDE OUT Dry Silicone Spray** is ideal for lubricating RV slide-outs. It is a clean, dry spray that doesn't leave a sticky residue which can attract dirt and grime.

It can also be used on wood, rubber and plastic surfaces and can waterproof leather, canvas, rubber and chrome.

Other QuestSpecialty products for RV-ing:

HOLDING TANK

2840 EARTH SCENTS Super Bugz Citrus Enzyme Treatment for Organic Waste is a non-toxic formula. It liquefies and consumes fats, oils and grease.

AIR CONDITIONING

3295 RE-FRESH Auto Air Conditioning Freshener removes foul, musty odors from air conditioning systems and kills the bacterial source.

TRASH BIN

3130 FIESTA ORANGE TWIST Jelled Deodorant: A clinging jell which continues to release fragrance for extended periods as it evaporates.

RUST REMEDIATION & PREVENTION

It is certainly unsightly, but rust can be more than a cosmetic issue. If left unchecked, **rust erodes surfaces and can lead to serious structural deterioration.**

Just ask the City of Chicago. Street lights are falling across the city and have been for some time due to corrosion. At one point more than 33,000 poles were having some type of serious issue.

Chicago isn't alone. Many municipalities are dealing with street light problems, with some rust conditions causing significant damage and injury.

After this particularly wet and cold winter season, it is a good idea to evaluate metal surfaces. **Particularly rust-prone are dock lifts, forklifts, compactors, fences, conveyors, handrails, lockers, dock doors, storage cabinets, scissor lifts, pallet jacks, and pumps.**

REMEDICATION

FOR LARGE JOBS

6410 RESTORE Rust Converter & Protective Coating converts rust into a black organic complex with a clear acrylic coating to protect the surface from further damage. Apply with brush, spray or swab.

FOR SMALL, INTRICATE JOBS

5960 REVIVE Rust Converter Spray treats rusted surfaces without brushing, sanding or scraping, converting it to an inert black polymer-based coating.

FOR STAINS

3010 TACKLE Rust, Calcium and Lime Deposit Remover removes rust stains from glass, chrome, fiberglass, stainless steel, porcelain, cement, stucco and tile.

PREVENTION

FOR PROTECTION

5540 DEFENSE EF Metal Parts Protector quickly coats metal parts to provide long-lasting outdoor protection.

FOR ZINC COATING

5700 QUIK-ZINC Galvanize Coating bonds electrochemically with ferrous metal forming a paintable coating of 93% pure zinc.

FOR LIGHT LUBRICATING

5340 MR. MECHANIC Light-Duty Penetrating Lubricant loosens corroded parts while displacing moisture and preventing rust.

NEW VIDEO: JELLED DEODORANTS

Imagine a pleasant scent wafting in the air every time you flip up the trash bin cover or turn on the ceiling fan. It's possible with our unique Jelled Deodorants.

Available in three different popular scents, jelled deodorants solve the problem of needing ongoing odor control in areas where metered air fresheners are not ideal or where a manual spray doesn't provide enough control.

They easily spray on any non-porous surface, convert to a jell, then evaporate slowly over time, continually releasing a fresh scent.

The thick, clinging jell allows the product to be applied on horizontal, vertical, textured and irregularly shaped surfaces.

3130 FIESTA ORANGE TWIST Jelled Deodorant

3200 FIESTA SWEET DREAMS Mulberry Jelled Deodorant

3770 FIESTA CUCUMBER MELON Jelled Deodorant

NEW INDUSTRIAL BROCHURE

Our newest brochure, "POWER PLUS" provides an overview of the specialty chemical solutions we offer for industrial applications.

Nine major product categories are listed as well as top-line descriptions of the offerings within each category. The nine categories are:

Degreasers	Lubricants
Penetrants	Greases
Contact Cleaners	Coil Cleaners / HVAC
Metal + Rust	Fleet Management
Specialty	

The brochure also provides a summary of QuestSpecialty's private label and contract filling capabilities.

Download a digital copy or ask your QuestSpecialty rep for printed copies.
