

CAFETERIA NECESSITIES

School cafeterias are the hub of activity early in the morning for breakfast and in the middle of the school day for lunch. There are nearly **100,000 schools and institutions** in the US serving school lunches to nearly 30.5 million students each day. In addition to lunches, there are over 90,000 educational facilities serving breakfasts to 14 million students each day.

Using specialty chemicals in school cafeterias will make fast work of keeping kitchens, cooking utensils, preparation surfaces, serving counters and tables clean and maintained.

KITCHEN / FOOD PREP AREAS
