RUST REMEDIATION + PREVENTION

If rust goes untreated, it just spreads and destroys the metal it attacks.

QuestSpecialty has the products to help protect metal surfaces from rust, as well as treating rust once it starts to stop it in its tracks.

RUST REMEDIATION

5960 REVIVE Rust Converter Spray

Eliminates brushing, sandblasting and scraping before painting rusted surfaces. Converts rust to an inert black polymer-based coating to prevent future rust from forming.

Key Points:

- Rust Converter: MIR: 1.1
- Allows treated surface to be painted
- Quick, mess-free application

6410 RESTORE Rust Converter & Protective Coating

Stops further erosion and rusting by converting rust into a black organic complex with a clear acrylic coating. The coating lasts for years, whether painted or not.

Key Points:

- Oxidizes corrosion and scale
- Can be painted using latex, oil-based or epoxy
- Apply by brushing, dipping, swabbing or spraying

3010 TACKLE Rust, Calcium and Lime Deposit Remover

Removes rust stains from glass, chrome, fiberglass, stainless steel, porcelain, cement, brick, stucco, tile and more. Also removes discoloration stains from fabric.

Key Points:

- Works quickly and effectively
- Neutral odor
- Also removes calcium and lime deposits

RUST PREVENTION

5540 DEFENSE EF Metal Parts Protector

Prevents rust and corrosion by quickly coating metal parts, castings, cables, winches, pulleys, etc. Long lasting outdoor protection; indefinite indoor protection.

Key Points:

- USDA authorized
- Meets MI Spec C-16173D, Grade 4 and C83933A
- No chlorinated or fluorinated solvents

5710 BLING IT ZINC Shiny Galvanized Coating

Protects iron and steel surfaces from rust and corrosion with two-way protection. High zinc content protective coating and true galvanic action. Meets ASTM A780.

Key Points:

- 93% pure zinc after drying
- Will not crack, peel or yellow even under extreme conditions
- Dries to flexible, paintable coating

6001 DEFENSE Rust Preventative & Metal Parts Protector

Prevents rust and corrosion (even due to salt spray) on all metal parts for extended periods of time: 3 mil coating for indefinite indoor storage; up to 1 year for outdoor.

Key Points:

- Will not crack, peel or flake
- Remove with kerosene or mineral spirits
- Flexible, weldable

5700 QUIK-ZINC Galvanize Coating

High quality, high solids, heavy-duty zinc coating for superior corrosion protection. Bonds electrochemically with ferrous metal to protect from oxidation.

Key Points:

- Will not crack, peel or yellow
- 93% pure zinc after drying
- Dries to flexible, paintable coating

5611 AVERT Corrosion Inhibitor

Rust and corrosion preventative for all metal parts. A 2 to 3 mil coating provides indoor storage protection for up to two years. Ideal for protection in transit.

Key Points:

- Non-drying formula
- Transparent film; easy to see through
- Can be removed with kerosene or mineral spirits and then painted.
