## PRODUCT SPOTLIGHT

**GET THE POWER OF A TRADITIONAL ORANGE PEEL-BASED D-LIMONENE BUT AT A LEMON PRICE POINT!**

Our **NEW LEMONATOR Citrus-Based Water Soluble Degreaser** is a powerful formulation that flushes away grease, tar and asphalt from hard surfaces with a forceful spray.

It contains no petroleum distillates and leaves a clean lemon odor.

Uses:

- Degrease trucks
- Remove printer's ink
- Remove tire marks
- Clean motors and equipment
- De-tar vehicles
- Clean equipment/tools

## MID-WINTER FLEET SPRUCE-UP

Winter came early this season which means extended environmental exposure for fleet vehicles. This is a good time to do a mid-winter "spruce-up."

**Check batteries for corrosion build-up, acid leaks and apply protection**

**8230 DETECT Battery Terminal Cleaner:** Cleans and neutralizes battery acid on terminals and cables. Also detects leaks with a color indicator.

**8220 CLINCH Battery Protectant:** Helps eliminate battery failure by leaving a protective coating on batteries, terminals, cable ends, wire, bolts, brackets and clamps.

**Be ready for windshield frost, ice and snow**

**8000 DE-ICE Frost and Ice Remover:** Stock vehicles with DE-ICE to quickly melt ice, frost and snow. The Sure Shot Extended Spray reaches high-reach windshields with a wide spray area. Works great on door locks, ignition locks and trunk locks.

**Protection from road salt**

**8000 COMMAND Automotive Polish:** Protects a vehicle's finish with this formulation of carnauba wax and PTFE. Just spray on and wipe off.

**2620 SHOWTIME Invisible Coating and Bug Shield:** Add an extra layer of protection by applying to areas most susceptible to salt, such as wheel wells and car doors.

**8170 SMOOTH RIDE Rubberized Undercoating:** This forms a tough shield that seals out moisture and salt to prevent rust and corrosion.

# WATCH OUT! GERMY SURFACES!

Flu season is in full swing! Consider the many high touch surfaces in your facility that can spread germs.

Germs are able survive on hard surfaces for hours, days and weeks. A study showed that **within two to four hours, 40% - 60% of high touch surfaces in a facility can be contaminated from a virus placed on a single table top or door handle.\***

Elevator buttons have been found to harbor 40 times more bacteria than a public toilet seat.

Strategically placing EXPRESS WIPES® GERM AWAY Hard Surface Disinfectant throughout your building encourages frequent disinfecting of these high-touch areas. With proper cleaning, exposure to contagious viruses can be reduced by 80%–90%.\*

## COMMERCIAL BUILDINGS

Elevator buttons, hand rails, touch screens, copier buttons, refrigerator handles, vending machines

## SCHOOLS

Water fountains, hand rails, touch pads, computer mice, vending machines, desktops

## FITNESS CENTERS

Treadmill handles, weight machine grips, hand weights, yoga mats, locker handles, water fountains

## QS DISINFECTANTS

GERM AWAY Foaming Germicidal Cleaner

PHENOMENAL II Hospital Disinfectant & Deodorant

STAF Air Sanitizer

EXPRESS WIPES GERM AWAY Hard Surface Disinfectant

QD-64 One-Step Germicidal Cleaner & Disinfectant

THRIFT-O One Step Germicidal Cleaner & Disinfectant

# CUSTOMIZATION DIVISION

Bag-on-Valve (BOV) packaging technology is HERE!

BOV packaging consists of a flexible bag attached to a valve system inside the can. Product is stored in the bag while the propellant is outside the bag.

This design delivers clean, controlled, and hygienic dispensing of liquids, viscous formulas, and even select solid formulations. BOV also provides these key advantages for our customization customers:

-  **PRODUCT INTEGRITY** - Product is separated from propellant protecting it from oxidation.
-  **FULL PRODUCT EXTRACTION** - Dispenses up to 99% of the product.
-  **ENVIRONMENTALLY FRIENDLY** - Propellants are compressed air or nitrogen, no VOC-containing propellants.
-  **360° ACTUATION** - Can be used at any angle with a continuous spray.
-  **VERSATILITY** - Wide range of product categories including skincare, food products, pharmaceuticals and industrial.

## BoV

- 

**PRODUCT DISPENSING**  
BOV dispenses up to 99%
- 

**PRODUCT PURITY**  
Product is separated from propellant
- 

**ENVIRONMENTALLY FRIENDLY**  
Propellants are compressed air or nitrogen

# FIXING STALE WINTER AIR

During the winter, buildings become tightly sealed environments. Doors and windows stay closed and heating systems work overtime. While this keeps facilities warm, it also traps stale air—allowing odors, humidity, allergens, and airborne contaminants to build up. Clear the air with these products:

### 5470 PYTHON EZ A/C Care Evaporator Coil Cleaner & Disinfectant

One-step disinfectant cleaner for commercial air handling equipment in hotels, public buildings, assisted living facilities and walk-in coolers.

### 3290 STAF Hospital Spray Disinfectant & Air Sanitizer

Disinfects hard surfaces. Can also be used as an air deodorizer, freshener and sanitizer (temporarily reduces airborne odor-causing bacteria).

### 3640 OUT COLD Total Release Smoke & Odor Eliminator

Neutralizes marijuana, cigar and cigarette smoke in cars, hotel rooms, bars, restaurants, dorm rooms, shelters and Air B&Bs.

### 2840 EARTH SCENTS SUPERBUGZ Citrus Enzyme Treatment

Deodorize and remove organic waste from carpet fibers with powerful bacteria which continue producing enzymes to continually clean and deodorize.

## EXTREME WEATHER

For those pieces of equipment, vehicles and control boxes that are exposed to the wicked winter weather, you need high performing lubricants and penetrants to gain access when Mother Nature makes it difficult.

**5451 BREACH** is an extreme performing penetrant that has high capillary action allowing it to break through layers of rust freeing up bolts and other fasteners.

**5330 SUPER PEN** is a moly fortified penetrant. Apply to prevent the forming of rust for easy service access.

**5420 SURRENDER** is an anti-seize for heavy duty protection from winter's wrath for bolts, screws and other fasteners that need to be serviced on a regular basis.

**5760 NUCHAIN** is a heavy duty lubricant, fortified with moly for extreme protection for all chain-driven equipment.

## STUBBORN UNEXPLAINED ODOR?

It may be leftover e-cigarette residue. Vape chemicals release VOCs that cling to air, fabrics, and walls, creating these odors:

- Sweet/Candy** – from flavored juices
- Tobacco/Herbal** – from nicotine or THC liquids
- Burnt/Acid** – from overheated or low vape coils

**AIR:**  
**3040 PRODIGIOUS** Citrus Total Release Malodor Neutralizer

**FABRICS:**  
**2290 BREAKDOWN** Active Bacteria Odor Eliminator

**HARD SURFACES:**  
**2640 ZIP** Citrus Cleaner & Degreaser

## TIPS TRICKS

### METERED AIR FRESHENERS

PLACE METERED AIR  
FRESHENERS STRATEGICALLY  
IN THE ROOM FOR  
MAXIMUM PERFORMANCE

**For safety:** Place them at least  
7 feet from the floor.

**For effectiveness:** By a door or  
where there is high foot traf-  
fic. This creates a natural draft  
to help disperse the fragrance.

Check out our **12 different**  
**metered air freshener scents!**

## FIND IT FASTER!

CHECK OUT OUR NEW ALPHA LOOK-UP!

We've added a new page on our website that lists all our products alphabetically.  
Access it from the top navigation bar under "Products."

The screenshot shows the QuestSpecialty website header with the logo and tagline "Your Specialty Chemical Resource". The navigation bar includes links for Home, Products, Biz Boosters, Markets, Resources, Literature, and Find Rep. The Products dropdown menu is open, showing options for Commercial, Industrial, New Products, and Alpha Product List, with a red arrow pointing to the Alpha Product List link. Below the navigation is a section titled "QuestSpecialty Product Category Overview" with four columns: Commercial Products, Industrial Products, New Products, and Alphabetical Product List. Each column has a representative image and a list of product categories.

Commercial Products:	Industrial Products:	New Products:	Alphabetical Product List:
 Air Fresheners, Carpet, Cleaners/Degreasers, Disinfectants, Enzymes, Floor Care, Greenscapes, Hand Cleaners, Housekeeping, Insecticides,	 Automotive, Coil Cleaners, Contact Cleaners, Degreasers, Lubricants, Metal Treatment, Penetrants, Specialties	 Recently introduced new products	 Look up products by name and access the full product page and product image.
